About Skelly and Loy, Inc.

That was then:

In 1969, LeRoy D. (Bud) Loy and Robert C. Skelly established Skelly and Loy, Engineers-Consultants, offering comprehensive services in mining and environmental research, planning, and design. One of their first actions as partners was to develop the standards by which the company would operate and, through the years, all management decisions have been based on the same three goals: to produce high quality work on time and within budget; to keep staff members gainfully employed through challenging work; and to earn a reasonable profit.

This is now:

Skelly and Loy's success in achieving the goals on which it was founded is best demonstrated through the continued growth of the firm and its impressive portfolio of repeat clients. A privately owned, mid-sized corporation with 5 Mid-Atlantic offices, Skelly and Loy provides a myriad of professional engineering and environmental services to various industries and businesses, government, and the private sector throughout the United States and abroad. Skelly and Loy continues to build on its strong foundation and enhance its offering of professional services.

- Engineering
- Environmental
- Geo-Environmental Investigations
- Cultural Resources
- Digital Information Technology
- After Market Services (AMS)

Experts with broadly based experience and sound technical skills work closely together to produce the superior work for which the firm is well known. Clients' requirements and desires are always kept foremost by working closely to develop the project. This cooperation between Skelly and Loy professionals and clients allows cross-pollination of ideas from many fields of expertise as well as from the client's own particular insight and experience. In each task undertaken, project personnel are carefully chosen to encompass the full range of disciplines required to completely analyze a problem and provide the best practical solution.

Using the GSA Schedule

What are the Advantages of Using the GSA Environmental Services Schedule?

- GSA has already reviewed Skelly and Loy's capabilities in depth and has qualified the firm for performing a wide variety of environmental tasks.
- When orders are placed against a GSA Schedule contract, they are considered to be issued using full and open competition.
- Federal customers can place an order directly with Skelly and Loy and receive services directly from Skelly and Loy without the delays and administrative requirements of other procurement methods.
- GSA Schedule orders have an average acquisition time of 14 days.
- A Blanket Purchase Agreement can be established for recurring tasks.
- Rates have already been negotiated with GSA.
- There is no maximum contract value.

How do I hire Skelly and Loy, Inc. through the GSA Schedule?

The process is simple and fast:

1. Orders up to \$2,500 (micro-purchase threshold): Develop a Statement of Work, select Skelly and Loy as the most appropriate contractor for your needs, and have your contracts office place the order directly with us.
2. Orders over \$2,500 but under \$5,000,000 (maximum order threshold): Develop a Statement of Work, prepare a request for quotes (RFQ), have your contracts office submit the RFQ via mail, fax, or e-mail to three GSA-approved Environmental Services Contractors including Skelly and Loy, select the contractor whose quote represents the best value, and have your contracts officer place the order directly with the chosen contractor.
3. Orders over \$5,000,000: Same procedures as #2, but RFQs are submitted to more than three GSA-approved Environmental Services contractors.

Your Statement of Work (a performance-based Statement of Work is preferred) should outline, at minimum, the work to be performed, location of work, period of performance, deliverable schedule, applicable standards, acceptable criteria, and any special requirements (i.e., security clearances, travel, special knowledge, etc.)

You may also review contractor information, including our price list, through the GSA Advantage online service at www.GSAAdvantage.com.

SIN 899-1: Environmental Consulting Services

Skelly and Loy, Inc. is an environmental planning and design firm specializing in providing natural, socioeconomic and cultural resource services for our clients whose projects require federal approvals, permits, or funding. Skelly and Loy's Environmental Service Groups staff includes environmental engineers, ecologists, biologists, hydrogeologists, botanists, and other environmental scientists. We maintain a reputation as a leader in providing environmental planning services in compliance with the wide spectrum of federal statutes, regulations, and policies. In particular, we have extensive expertise and experience with projects conducted in compliance with the National Environmental Policy Act (NEPA), the Clean Water Act, the Clean Air Act, the National Historic Preservation Act, the US DOT Act, the US Endangered Species Act, the Civil Rights Act, and the Federal Land and Water Conservation Act. Our technical capabilities include, but are not limited to:

- Environmental Impact Statements Under NEPA
- Endangered Species and/or Wetlands Analysis
- Watershed, Natural Resource, Archaeological and Cultural Resource Management Plans
- Environmental Program Management and Environmental Regulation Development
- Community Impact/Environmental Justice Assessments/Socioeconomic Analyses
- Secondary and Cumulative Impact Analyses
- Land Use and Growth Management Assessments
- Stormwater Management and Erosion and Sedimentation Control
- Air and Noise Analyses; Farmland Assessments
- Agency Coordination and Public Involvement Programs and Conflict Resolution

Skelly and Loy, Inc.'s Geo-Environmental Service Group is a leading-edge provider of professional and technical support services in the assessment of contaminated or potentially contaminated sites also involving Environmental and Hazardous/Toxic Engineering Services. Professional qualifications for these primary areas include appropriately experienced, trained, and accredited personnel with current credentials and certifications. We share a successful 20 year history of past performance in support of military installations, federal agencies, and state/local government owing to our ability to balance team/staff resources with project efforts and project schedules in order to smoothly accomplish multiple task orders within time and cost limitations. Additionally, our demonstrated team experience with a variety of specialized contractors provides quick assemblage of a qualified team while minimizing responsiveness. Relevant experience includes, but is not limited to:

- Data Collection, Feasibility or Risk Analysis
- RCRA/CERCLA Site Investigation
- Hazard and Exposure Assessments; Waste Characterization and Source Reduction Studies
- Review and Recommendation of Waste Tracking or Handling Systems
- Waste Management Plans and/or Surveys
- Review of Technologies and Processes Impacting Waste Management
- Development, Management and Operation of Recycling Programs
- Preliminary Assessments/Site Inspection Assessments (PA/SI)
- Phase I and II Environmental Site Assessment Process
- Environmental Inventories and Baseline Studies
- Environmental and Hazardous/Toxic Investigations
- Integrated Assessments (IA) and Brownfields Assessments (BA)
- Waste Collection, Characterization, and Removal
- Underground/Aboveground Storage Tank Closures
- Preparation of Specifications and Designs for Removal/Remediation/Abatement/Restoration
- Personnel and Equipment Requirements
- Hydrological, Fate and Transport Modeling
- Human Health and Enforcement Support
- Ecological Risk Assessments
- Data Validation/Contractor Laboratory Program (CLP) Support Services

SIN 899-7: Geographic Information Systems (GIS) Services

Skelly and Loy, Inc.'s staff has extensive experience using Geographic Information Systems (GIS) for environmental, mining, and cultural resource projects. Our GIS staff is trained in the use of the latest desktop, server, and Web-based GIS technologies. Skelly and Loy has developed GIS in support of Environmental Impact Statements (EIS), Environmental Assessments (EA), Phase I site assessments, wetland mitigations, habitat assessments, corridor studies, alternatives analyses, historic architecture assessments, and archaeological site prediction models. In addition to desktop applications, Skelly and Loy's GIS staff has developed custom applications for field data collection and incorporation into an enterprise database system. Our GIS staff deploys Web-based applications via ArcIMS and ArcSDE as a cost-cutting solution for our clients.

The GIS team at Skelly and Loy is experienced in the development of primary data as well as the collection and incorporation of secondary source information. We have experience in creating and maintaining spatial databases (geodatabases) and non-spatial databases which can be integrated with GIS features. Relevant experience includes, but is not limited to, the following:

- Mapping and Cartography
- Natural Resource Planning
- Site Selection
- Land Use Planning
- Transportation Planning
- GIS Modeling
- Pollution Analysis
- Watershed Assessments
- Asset Management
- Emergency Preparedness Planning
- Geologic Logs, Topographic Data, 3D/4D Interactive Visualization Packages
- Data Interpretation

SIN 899-8: Remediation and Reclamation Services

Skelly and Loy, Inc.'s Geo-Environmental Service Group is a leading-edge provider of professional remedial support services including planning and implementation related to environmental and hazardous/toxic investigations; preparation and implementation of plans for the sampling and analysis of hazardous/contaminated materials; planning and implementation related to environmental restoration; implementation and oversight of site-specific Health and Safety Plans; and preparation of concept, preliminary, and detailed design for the removal/remediation/abatement/restoration of areas and/or facilities with environmental hazards including soil and groundwater, lead paint, asbestos, PCBs, and other contaminated wastes. Professional qualifications for these primary areas include appropriately experienced, trained, and accredited personnel with current credentials and certifications.

We share a successful 20-year history of past performance in support of military installations, federal agencies, and state/local government owing to our ability to balance team/staff resources with project efforts and project schedules in order to smoothly accomplish multiple task orders within time and cost limitations. Additionally, our demonstrated team experience with a variety of specialized contractors provides quick assemblage of a qualified team while minimizing responsiveness.

Professional qualifications in the primary remedial areas include emergency response and cleanup specialist, environmental engineering, environmental scientist, certified industrial hygienist, biologist, geologist, chemist, hydrology, hydraulic engineering, civil, and geotechnical engineering. Qualifications for other related design efforts include technical support, including drawing production and other related graphic data efforts, specification writers, cost estimators, and surveyors. Many of our staff members have more than 15 years of demonstrated project participation and shared working relationships while employed with Skelly and Loy. These team members possess proven project management and quality assurance capabilities and demonstrated experience involving the most complex projects and schedules, particularly during periods of peak demand. Our experience has shown that, in order to ensure that the project process flows smoothly, a project setting with well-defined organizational roles and responsibilities is an essential element for successful Program Management. Furthermore, these well-defined organizational roles and responsibilities are proven key elements that enable our firm to continually expand the range of experience of our staff with the added benefit of professional growth. Relevant experience includes, but is not limited to, the following.

- Preparation, Characterization, Field Investigation, Conservation, and Closure of Site
- Long-Term Monitoring/Long-Term Operation (LTM/LTO)
- Containment, Monitoring, and/or Reduction of Hazardous Waste Sites
- Ordinance Removal and Support
- Excavation, Removal, Transportation, Storage, Treatment, and/or Disposal of Hazardous Waste
- Wetland Restoration
- Emergency Response
- UST/AST Removal
- Air Monitoring
- Soil Vapor Extraction, Stabilization/Solidification, Bio-Venting, Carbon Absorption, and/or Reactive Walls and Containment
- Remedial Action Plans and Designs
- Alternatives Evaluation
- Environmental Restoration
- Regulatory Agency Coordination
- Permitting
- Treatability Studies
- Pilot Testing
- Design, Construction, Installation, Operation, and Maintenance of Soil and Groundwater Treatment Systems Including Soil Vapor Extraction, Air Sparging, Ultraviolet, Dual Phase Extraction, Pump and Treat, Air Stripping, Slurry Walls, Grout Curtains, and Bioremediation

Who Can Use This Contract?

The agencies and activities named below may use contracts established under this Federal Supply Schedule:

- All federal agencies and activities in the executive, legislative, and judicial branches.
- Any government contractors authorized in writing by a federal agency pursuant to 48 CFR 51.1.
- Mixed ownership government corporations (as defined in the Government Corporation Control Act).
- The government of the District of Columbia.
- Other activities and organizations authorized by statute or regulation to use GSA as a source of supply.
- In the even of a major disaster, state and local governments can use GSA schedules for recovery efforts. The RC after our SINS identifies Skelly and Loy as a contractor eligible to offer recovery services.

For a complete list of eligible users, visit the GSA Website at www.GSA.gov.
